DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 are allowed over prior art of record. The newly cited reference is cited as being representative of prior art of record. Butler teaches the well-known technique of overlaying video programming with interactive content. However Butler, similar to other prior art of record, discloses that the chromakey color being used for transparency purposes is a predetermined color, see Para 0023 & 0036.

The subject matter presented in the independent claims requires, 'examining the interactive content to select a color that is not being used by the interactive content; assign the color as a transparent color; and set portions of the enhanced content corresponding to the video content location data, as the transparent color. This feature is not taught in prior art of record.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Butler Teaches merging video content with interactive content, by using a particular predetermined color key, in a well-known chromakey algorithm.
